

Live life, breathe free

INDOOR AIR QUALITY EXCELLENCE

Auroris Inc.[™], a sister company of ECO Earth Sciences Inc., is committed to the advancement of Indoor Air Quality where **health, vitality** and **safety** are paramount and the quality of the air we experience rivals that found only in the **most pristine natural environments**.

Technologies developed by **ECO Earth Sciences Inc.** have been used the world over. Clients include many from the Private Sector, multiple branches of the Military of both the United States and Canada and over 200 government agencies and institutions on four continents.

WHAT MAKES AURORIS™ THE BEST IN THE INDUSTRY?

PERFORMANCE UNEQUALLED

SMART IAQ™ – INDOOR AIR QUALITY EXCELLENCE

ALL Auroris HRV/ERV are **Next Generation, Smart IAQ™ compliant**. Fully configured, **Smart IAQ™** creates the freshest, cleanest, healthiest air environment possible.

TRUE AUTOMATED AIRFLOW BALANCING*

The industry's **FIRST** Patented True Automated Airflow Balancing Technology (TAB™) continuously monitors and balances airflow at all elevations, under all conditions.

QUIETEST IN ITS CLASS

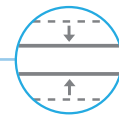

Constructed with UL certified sound insulation for maximum noise reduction, Auroris® is among the Quietest in the Industry.

LOW-PROFILE DESIGN

Low-profile design for maximum space efficiency allowing installation and retrofits in a wide range of locations.

SENSIBLE RECOVERY EFFICIENCY (Thermal Transfer)

Auroris® SRE/TRE is among the very best in the industry.

ENERGY EFFICIENCY

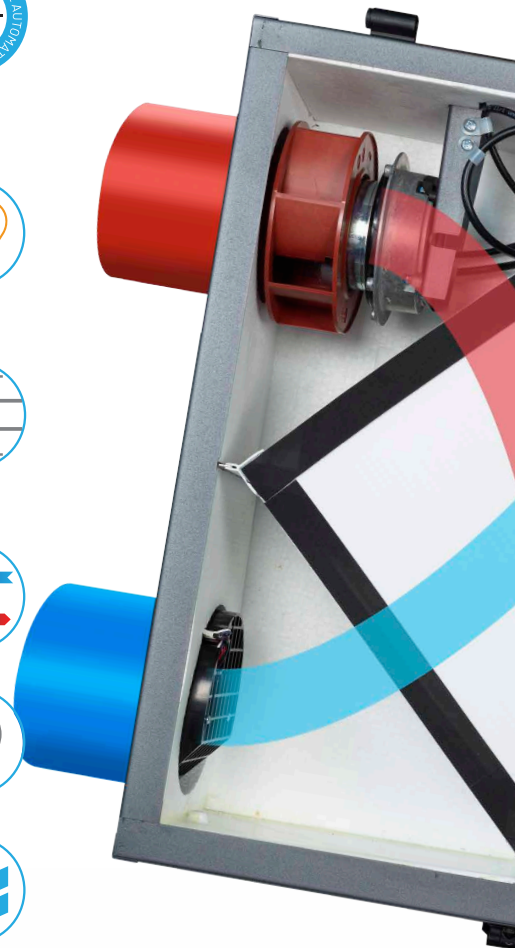

Auroris® CFM per watts is among the very best in the industry.

MILITARY GRADE CONSTRUCTION

Auroris® HRV/ERV's are designed and constructed to Military Specifications using heavy gauge steel and welded joints. Each unit is individually powder coated.

* Select Units Only

PRIMUS™ SERIES by Auroris™

Best in class engineering, energy and thermal recovery efficiency.

The industry's very first **True Automated Airflow Balancing (TAB™)**.

Low profile design for maximum space/design efficiency.

Unique tilted core design provides maximum drainage.

Advanced Sound Reduction Engineering.

High efficiency advanced Recirculation defrost.

Military Grade Design/Construction

Next Generation, Smart IAQ™ Compliant.

Primus™, your first choice for Comfort, Performance and Efficiency!

Horizontal OR
Vertical Installation.

PRIMUS FRESH AIR EXCHANGERS	Primus XT Series		Primus AXT Series	
Type	HRV	ERV	HRV	ERV
Model #	HPXT-150	EPXT-150	HPAXT-150	EPAXT-150
Core Size	12" x 12" x 6-3/4"			
Motor	ECM			
Unit Dimension	27-3/4" x 21" x 9-1/4"			
Air Flow (CFM) 0.2 SP	151	143	148	146
Air Flow (CFM) 0.4 SP	138	131	157	150
*SRE 0° C	82%	76%	70%	67%
*SRE -25° C	72%	63%	65%	57%
**ASE 0° C	91%	87%	74%	70%
**ASE -25° C	86%	94%	67%	60%
Defrost Type	Recirculation Defrost			
TAB™ True Automated Airflow Balancing				
HVI				
Energy Star				
Warranty	5 Year Limited Warranty			

* SRE = Sensible Recovery Efficiency

** ASE = Apparent Sensible Effectiveness

For more information see <https://auroris.org/primus>

TAB™

True Automated Airflow
Balancing Technology.

Maintains constant airflow at desired
CFM at any elevation or condition.

**SMALL PROFILE/
MAXIMUM PERFORMANCE**

Innovative design 40% slimmer than the
competitors allows for unit installation and
retrofits in a wide range of locations.

QUIETEST IN ITS CLASS

Constructed with UL certified sound
insulation for maximum noise reduction.

MILITARY GRADE CONSTRUCTION

Constructed using heavy gauge steel
welded joints individually powder coated.

SOLAS™ SERIES by Auroris™

Quality, Value and Performance converge.

Unique tilted core design provides maximum drainage.

Advanced Sound Reduction Engineering.

High efficiency advanced evacuation defrost.

Military grade Design/Construction

Next Generation, Smart IAQ™ Compliant.

Solas™, the logical choice for quality, value and performance!

SOLAS FRESH AIR EXCHANGERS	Solas C Series		Solas H Series		
Type	HRV	ERV	HRV	HRV	ERV
Model #	HSC-100	ESC-100	HSH-160ES	HSH-200	ESH-200
Core Size	12"x 12"x 6-3/4"		12"x 12"x 10-3/4"		
Motor	PSC				
Unit Dimension	20" x 21"x 9-1/4"		23"x 21-1/2"x 12-1/2"	23" x 23"x 12-1/4"	
Air Flow (CFM) 0.2 SP	70	89	148	187	199

Introducing Smart iAQ™

The Industry's most advanced Indoor Air Quality (IAQ) Solution.

Step 1 TAKE CONTROL

CO₂, VOC's and PM 2.5 levels are continuously monitored and measured.

All Auroris HRV/ERV's as well as Plasmasphere™ are Smart iAQ™ Intelligent Devices, able to receive ventilation or mitigation instructions based on contamination levels or alerts.

INDOOR AIR QUALITY (IAQ™) ... AUTOMATED

If CO₂ levels rise (due to increased occupancy, cooking etc.) the Smart iAQ™ Controller instructs the HRV/ERV ventilation device to increase the rate of air changes until the level drops.

If an increase in PM 2.5 is detected the Smart iAQ™ Controller instructs Plasmasphere™ to increase the incoming air's energy and address the aerosol particulate contamination.

3 Step Air
Purification

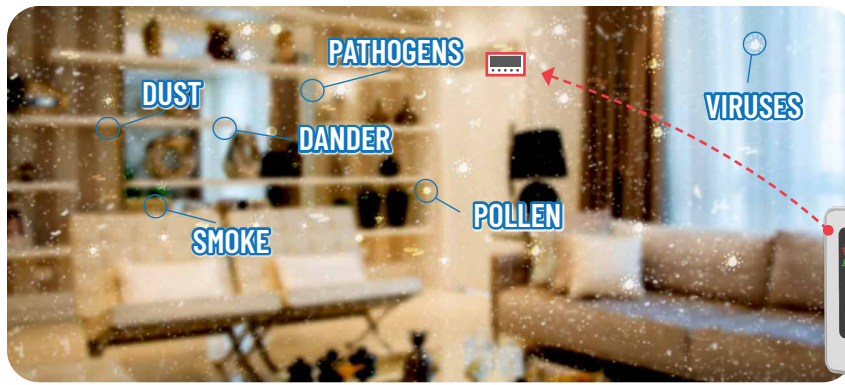

Restore
the Air's
Natural
Energy

Step 2 START WITH THE FRESHEST, CLEANEST, PUREST AIR

INCOMING PURE
FRESH AIR

Plasmasphere™ cleans incoming air with an advanced three stage Purification process resulting in only the freshest, cleanest air possible.

AEROSOL CONTAMINATION

Microscopic aerosol contamination can remain in the airspace for hours unaffected by air currents. The Smart IAQ™ Controller detects increased levels of PM 2.5 and takes the appropriate action.

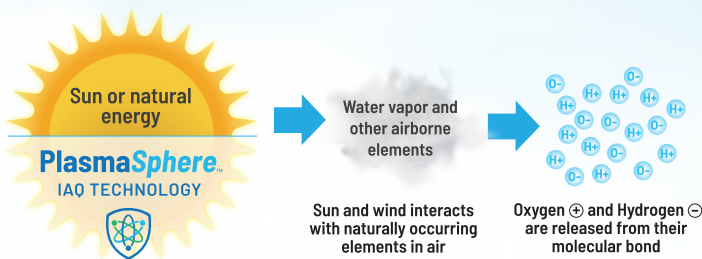

Step 3

LET'S CLEAR THE AIR

NATURE'S AIR DISINFECTION SYSTEM

In nature, air has energy. Energy created by the sun, the wind and the waves. This natural defense/disinfection system has existed since the beginning of time. *PlasmaSphere™* emulates this same process.

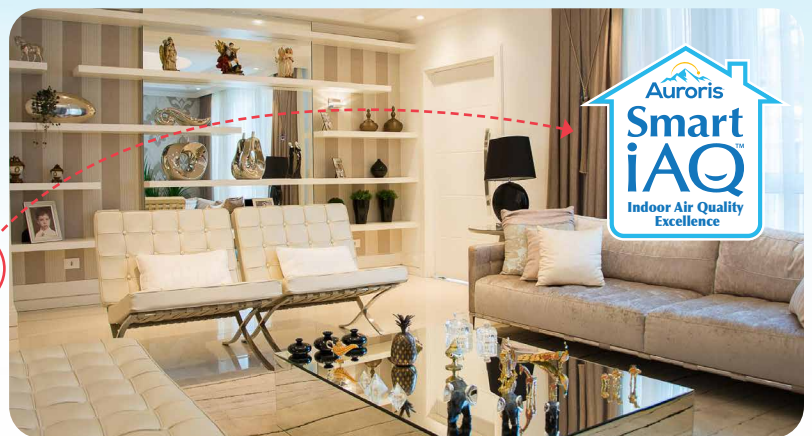

Aerosol and other contaminants charged by the introduction of fresh air enriched with natural energy agglomerate or clump together. This "clumped" particulate gains mass and weight dropping out of the breathing zone and is more effectively captured by the return air filtration system.

Result

CLEAN, SAFE, HEALTHY AIR

Smart IAQ™ creates the cleanest air experience possible ensuring that our indoor spaces are kept safe, mitigating the spread of viruses and other pathogens and reducing environmental sensitivities.
